

YARED SANTIAGO GONZÁLEZ

WEB DEVELOPMENT

PROFILE SUMMARY

I am a software developer graduated from the IronHack Madrid Bootcamp. Currently, I am working as a front-end developer at Intelygenz, a tech company specialized in software and AI solutions for companies to take their business to the next level.

I am really enthusiastic about technology and the changes it will generate in our society. Next to that, I am creative, empathic and thorough, always eager to improve my skills and to keep on learning.

LANGUAGES

- Spanish (Native)
- English (Upper-intermediate)

- ExpressJS
- MongoDB
- SQL
- Docker
- Control Version (Git)
- Testing (Jest - Enzyme - RTL)

SOFT SKILLS

- Creative
- Self-taught
- Communicative
- Proactive
- Constant

EMPLOYMENT HISTORY

FRONTEND DEVELOPER

Intelygenz | 2019 - Present

Intelygenz is the company that made me grow to be who I am today.

I began by providing support for a large monolithic web application built with Node.js and AngularJS.

However, after a couple of years, I took advantage of an opportunity to dive into the world of frontend development with ReactJS.

Wanting to dedicate myself entirely to frontend work, I dived deep into learning ReactJS and had the chance to contribute to the development of a comprehensive system of applications and tools for monitoring contact centers at a major multinational company.

EDUCATION

CABIFY

Distributed Systems building principles. Backend Bootcamp.

- Docker. Redis. Queues systems. DB replication
